

Sound protection hoods for interval impactors of the series PKL are intended to reduce the sound effectively. To reduce the sound effectively, the impacted plates have also be insulated (eg thermal insulation).

The lining consists of acoustic enclosures

1. one noise-absorbent mat and
2. one absorption foam mat.

Operating temperature: max. 100°C (HT version on request).

Material: Stainless steel sheet, galvanized steel or aluminum sheet.

Dimensions:

Sound protection hood	L [mm]	B [mm]	H [mm]	Galvanized steel sheet		Aluminum sheet		Stainless steel
